

BIDS AND AWARDS COMMITTEE

SUPPLEMENTAL BID BULLETIN NO. 01

Supply, Delivery, Installation, Testing and Commissioning of PNOC Network Expansion Project

Invitation to Bid No. 2026-04-045

The PNOC Bids and Awards Committee hereby adopts the following amendments in the Philippine Bidding Documents:

1. Clarifications:

QUERIES	PNOC'S RESPONSE
Whether bidders be allowed to propose alternative switch models to replace the existing switch should the 10Gb SFP+ requirement be mandatory.	The replacement of existing switches is strictly outside the scope of this procurement project. Bidders must focus solely on the expansion requirements specified.
Whether the required On-Premise Hardware Network Controller is intended to manage both the switches and wireless access points, or only the wireless access points.	The On-Premise Hardware Network Controller must be capable of managing both the new POE network switches and the wireless access points.
Whether a cloud-based network management solution may be considered as an alternative to the required on-premise network controller solution.	A cloud-only management solution will not be accepted. The network controller must be deployed on-premise. Hybrid solutions (combining on-premise and cloud management) are acceptable, provided the core on-premise hardware requirement is fully met.
Floor plan to be used for the heatmapping.	The building floor plans required for Wi-Fi heat mapping will be provided to prospective bidders during the scheduled site visit.
